*Optimizing Flu Vaccine Planning at NorthShore University HealthSystem* Sarang Deo, Ilya Kolesov, Sachin Waikar, 2017 Stan Kent, vice president of pharmacy at NorthShore University HealthSystem, is faced with the challenge of seasonal planning for the influenza vaccine. The supply received by the multilocation healthcare system is unreliable in terms of timing and quantity. As part of improved planning, Kent is contemplating a new contract with NorthShore's major supplier of flu vaccines. The options under consideration include fixing either the date of delivery or the quantity delivered. The main decision involved in either option would be how much vaccine to order. The case also provides details about the seasonal influenza epidemic in the United States, illustrates operational complexities of the U.S. flu vaccine supply chain, and provides a brief description of the various channels used to distribute flu vaccine to end consumers. The main objective of the case is to illustrate supply chain decision making when there is an unreliable supply (in contrast to the usual case of uncertain demand). A secondary objective is to make students think about appropriate internal (within sector) and external (other sectors) benchmarks to evaluate the performance of a health commodity supply chain.

*Becoming the Best* Harry M. Kraemer, 2015-02-11 What does it mean in practice to be a values-based leader? When faced with real situations, how can you be your best self and create best teams—while also being a best partner with customers and vendors, a best investment for your stakeholders, and a best citizen making a difference in the world? It's a tall order, but these are the expectations for world-class organizations today. In his bestselling book *From Values to Action*, Harry Kraemer showed how self-reflection, balance, true self-confidence, and genuine humility are the traits of today's most effective leaders.

In *Becoming the Best*, his highly anticipated follow-up, Kraemer reveals how, in practical terms, anyone can apply these principles to become a values-based leader and to help create values-based organizations. Drawing on his own experiences as the former CEO and chairman of Baxter International, as well as those of other notable leaders and organizations, Kraemer lays out a pathway for understanding the principles and putting them into practice, showing specifically how to: Use self-reflection to become your best self as you lead yourself and others more effectively Create a best team that understands and appreciates what they're doing, and why Forge best partnerships through win/win collaboration with vendors and customers that enhance the end user's experience Support the mission, vision, and values of the organization to generate returns that distinguish a best investment Make a difference in the world beyond the organization by becoming a best citizen Powerful case studies from Campbell's Soup, Ernst & Young, Target, Northern Trust, and many others demonstrate the four principles of values-based leadership in action and show how thinking beyond the corporation can trigger positive outcomes for both the company and the world. Regardless of level or job title, individuals can make a difference in their organization and beyond by embodying the essential traits of a great leader. *Becoming the Best* offers a definitive, actionable guide to show anyone how to apply in practice the principles of values-based leadership personally and professionally, making it an indispensable manual for the new wave of better leaders.

Evanston Hospital School of Nursing: 1898-1984 Carolyn Hope Smeltzer and Barbara Ann McQuillan, 2022-09-05 Using historical images and recollections, *Evanston Hospital School of Nursing: 1898-1984* highlights the marketing, education, curriculum, and values of EHSN as well as the students' experience and dormitory life. Evanston Hospital was founded in 1891, followed by the school of nursing seven years later. Evanston Hospital School of Nursing (EHSN) provided education at a reasonable cost while the students provided care to patients in between studies. In its first 50 years, the school graduated 1,157 nurses, with the first class of two graduating in 1901. EHSN, like other diploma programs, flourished until educational cost escalated, technology boomed, training methods evolved, and a conversation about where and how nurses should be educated began. After 86 years of training nurses, EHSN closed. Carolyn Hope Smeltzer and Barbara Ann McQuillan, 1972 EHSN graduates, are proud of their education and realize the historical value of the program. Having graduated 50 years ago, they are passionate about preserving the school's history and capturing classmates' memories. Their desire to keep alive EHSN history enables past generations of diploma graduates to cherish their own memories and future generations of nurses to look back on past teaching practices. This book will elicit familiar fond memories for all who attended or taught in any diploma school of nursing.

Basic Principles of Cardiovascular MRI Mushabbar A. Syed, Subha V. Raman, Orlando P. Simonetti, 2015-10-29 This book is a comprehensive and authoritative text on the expanding scope of CMR, dedicated to covering basic principles in detail focusing on the needs of cardiovascular imagers. The target audience for this book includes CMR specialists, trainees in CMR and cardiovascular medicine, cardiovascular physicists or clinical cardiovascular imagers. This book includes figures and CMR examples in the form of high-resolution still images and is divided in two sections: basic MRI physics, i.e. the nuts and bolts of MR imaging; and imaging techniques (pulse sequences) used in cardiovascular MR imaging. Each imaging technique is discussed in a separate chapter that includes the physics and clinical applications (with cardiovascular examples) of a particular technique. Evolving techniques or research based techniques are discussed as well. This section covers both cardiac and vascular imaging. Cardiovascular magnetic resonance (CMR) imaging is now considered a clinically important imaging modality for patients with a wide variety of cardiovascular diseases. Recent developments in scanner hardware, imaging sequences, and analysis software have led to 3-dimensional, high-resolution imaging of the cardiovascular system. These developments have also influenced a wide variety of cardiovascular imaging applications and it is now routinely used in clinical practice in CMR laboratories around the world. The non-invasiveness and lack of ionizing radiation exposure make CMR uniquely important for patients whose clinical condition requires serial imaging follow-up. This is particularly true for patients with congenital heart disease (CHD) with or without surgical corrections who require lifelong clinical and imaging follow-up.
