Bebas Virus Selamanya Ahmad Suhendro, **The Magic Of Being Hacker** Priyank Gada, 2014-01-07 About Book Infected by viruses and malwares Read this book and try DIY disinfecting A hackers guide to remove viruses malwares adwares spywares as well as other malicious softwares *Stuxnet* Roman Poroshyn, 2019-11-24 Duqu the infamous malware from the Stuxnet family made its return First discovered in October 2011 Duqu was actively spying on digital certificate issuing authority in Hungary The exposed malware was abandoned by its originators and added to a blacklist database of anti virus software After that initial discovery Duqu had been out of the spotlight for almost four years until one of the biggest names in cyber security Kaspersky Lab announced that it recently detected the presence of the Duqu malware Duqu was always after the high profile targets but this time the malware was definitely in the wrong place Duqu had been found alive and well within Kaspersky Lab s very own corporate computer network That discovery had big implications not only for the ways anti virus software detects intrusions but also for Kaspersky Lab itself Usually malware after being detected has no means of fighting back It was not the case with Duqu Two years after its exposure the Duqu malware had its revenge In 2017 the USA UK and some other European countries issued a ban on the use of Kaspersky Lab computer security software on their government and military computers Their decision was based on information presented to them by the originators of the Duqu malware which had been quietly stealing data from inside of Kaspersky Lab s corporate computer network In an unbelievable turn of events detection of malware by one of the most recognizable names in information security industry led

to a removal of Kaspersky Lab's anti-virus software from computers that by association require the most protection because they keep top secrets and constantly targeted by adversaries To better understand how it could have happened we need to start exploring the story about the Duqu malware the only malware that had its revenge *Online!* John Dvorak,Chris Pirillo,Wendy Taylor,2004 A perfect gift for any Internet user whatever their level of experience bull Written in a straight to the point understandable format in jargon free language by some of the most popular personalities in the field bull Backed by a massive marketing campaign including TV radio print and online appearances by the authors *The Compatriots* Andrei Soldatov,Irina Borogan,2019-10-08 The authors of *The Red Web* examine the shifting role of Russian expatriates throughout history and their complicated unbreakable relationship with the mother country be it antagonistic or far too chummy The history of Russian espionage is soaked in blood from a spontaneous pistol shot that killed a secret policeman in Romania in 1924 to the attempt to poison an exiled KGB colonel in Salisbury England in 2017 Russian migr's have found themselves continually at the center of the mayhem Russians began leaving the country in big numbers in the late nineteenth century fleeing pogroms tsarist secret police persecution and the Revolution then Stalin and the KGB and creating the third largest diaspora in the world The exodus created a rare opportunity for the Kremlin Moscow's masters and spymasters fostered networks of spies many of whom were emigrants driven from Russia By the 1930s and 1940s dozens of spies were in New York City gathering information for Moscow But the story did not end with the collapse of the Soviet Union Some migr's have turned into assets of the resurgent Russian nationalist state while others have taken up the dissident challenge once more at their personal peril From Trotsky to Litvinenko *The Compatriots* is the gripping history of Russian score settling around the world
